

# Student OS

## V1 progress checklist

Updated 30 September 2026

**30 of 74** items are built. A filled box means the feature is built and in the current code. An empty box means it is still to do. Built does not mean tested: every screen still needs trying on a real phone with real data.

|                                             |        |
|---------------------------------------------|--------|
| Foundation and setup                        | 5 of 8 |
| Accounts and profile                        | 3 of 7 |
| Subjects                                    | 2 of 5 |
| Timetable                                   | 6 of 9 |
| Today screen                                | 4 of 6 |
| Attendance                                  | 4 of 7 |
| Tasks (assignments, lab manuals, tutorials) | 3 of 6 |
| Exams                                       | 3 of 5 |
| Reminders and notifications                 | 0 of 3 |
| Before you share V1 with friends            | 0 of 6 |
| Version 2 (from the product overview)       | 0 of 6 |
| Version 3 (future)                          | 0 of 6 |

### Foundation and setup

5 of 8 built

|                                     |                                                                 |
|-------------------------------------|-----------------------------------------------------------------|
| <input checked="" type="checkbox"/> | React + Vite + Tailwind CSS project with a phone-first layout   |
| <input checked="" type="checkbox"/> | Supabase database; every table protected by Row Level Security  |
| <input checked="" type="checkbox"/> | Database changes saved as numbered files in supabase/migrations |
| <input checked="" type="checkbox"/> | README, Code Tour and tests for the attendance maths (npm test) |
| <input checked="" type="checkbox"/> | Vercel config so page refreshes work                            |
| <input type="checkbox"/>            | Deploy to Vercel and share the link with friends                |
| <input type="checkbox"/>            | Installable on the home screen (PWA: icon and install prompt)   |
| <input type="checkbox"/>            | Faster first load (split the code into smaller chunks)          |

## Accounts and profile

3 of 7 built

- ☒ Sign up and sign in with email and password
- ☒ Profile created automatically at sign-up
- ☒ Profile page: name, roll number, college, department, semester, division
- ☐ Forgot-password flow
- ☐ Delete my account and data
- ☐ Sign in with Google
- ☐ Roles: professor, cultural head, admin (on hold on purpose)

## Subjects

2 of 5 built

- ☒ Add subjects quickly: name, optional code, colour chosen for you
- ☒ Remove a subject
- ☐ Edit a subject (rename, recolour)
- ☐ Archive subjects at the end of a semester
- ☐ Subject workspace for notes and links

## Timetable

6 of 9 built

- ☒ Add weekly classes: subject, day, time, room, building, professor
- ☒ Pick several days at once for classes that repeat during the week
- ☒ End time fills in by itself; the next class starts where the last one ended
- ☒ Week view grouped by day
- ☒ Share your timetable with a code; classmates add it in one tap
- ☒ Stop sharing; codes expire after 30 days
- ☐ Edit a class
- ☐ Alternate-week classes (for example lab batches)
- ☐ Holidays and days off

## Today screen

4 of 6 built

- ☒ Today's classes with Now and Next
- ☒ Mark Present, Absent or Cancelled (tap again to undo)
- ☒ Attendance warnings
- ☒ Coming up: task deadlines and exams
- ☐ Today's reminders
- ☐ Catch up on earlier days you forgot to mark

## Attendance

4 of 7 built

- ☒ Attended, held and percentage for each subject
- ☒ Your own minimum percentage
- ☒ Classes needed in a row, or classes you can still skip
- ☒ Starting numbers for each subject (moved here from Subjects)
- ☐ History for each subject
- ☐ A different minimum for one subject
- ☐ What if I skip tomorrow? calculator

## Tasks (assignments, lab manuals, tutorials)

3 of 6 built

- ☒ Types: assignment, lab manual, tutorial, practical file, project, presentation, other
- ☒ Subject, due date and time, priority, notes
- ☒ Tick when done; filter by type; overdue items highlighted
- ☐ Edit a task
- ☐ Attach a photo or PDF
- ☐ Repeating tasks

## Exams

3 of 5 built

- ☒ Exam with subject, title, date, time and room
- ☒ Countdown and preparation progress
- ☒ Past exams kept separately

- 
- ☐ Edit an exam
  - ☐ Topic checklist for each exam
- 

## Reminders and notifications

0 of 3 built

- ☐ Reminders: title, date, time, category (submission, fee, document, event)
  - ☐ Repeating reminders
  - ☐ Real notifications on your phone (push or email)
- 

## Before you share V1 with friends

0 of 6 built

- ☐ Run migration 002 in Supabase
  - ☐ Try every screen on a real phone, on Wi-Fi and on mobile data
  - ☐ Decide how to handle networks that block supabase.co (route requests through your own domain)
  - ☐ Privacy policy and terms page
  - ☐ A way for friends to send feedback
  - ☐ Basic usage numbers (how many people open it each day)
- 

## Version 2 (from the product overview)

0 of 6 built

- ☐ Expense tracker: categories, monthly budget, summaries
  - ☐ Cultural and college events: create, publish, show details
  - ☐ Student registration for events
  - ☐ Custom registration forms
  - ☐ Cultural head tools to manage registrations
  - ☐ Admin overview (needs roles)
- 

## Version 3 (future)

0 of 6 built

- ☐ AI assistant that knows your timetable, tasks and exams
  - ☐ Natural-language reminders
  - ☐ AI study planner
  - ☐ Notes and syllabus PDF understanding
-

- 
- ☐ Smart notifications
- 
- ☐ Collaboration and more college services
- 

## Ideas to discuss

Not decided. Pick the ones worth building after V1 is in your friends' hands.

**Class groups.** A shared class space where one timetable change updates everyone. One student sets it up and the whole class joins, which makes it the natural growth loop.

---

**WhatsApp share button.** Send the timetable code with a ready-made message.

---

**Google sign-in.** One tap instead of a password, and no forgotten passwords.

---

**Skip planner.** See what happens to your attendance if you skip tomorrow before you decide.

---

**Holidays and days off.** Mark them once so attendance stays honest.

---

**Exam planner.** Spread the topics across the days left before an exam.

---

**Semester rollover.** Archive old subjects and start fresh while keeping the history.

---

**Weekly summary.** One message each Sunday: this week's classes, deadlines and exams.

---
